1. Short software description

Software recovers video files captured with Canon cameras.

Files are recovered from memory cards or their images.

The software recovers fragmented video files even when other software can't recover them.

2. System requirements:

- Operation system: Windows 7, Windows 10.
- Hard disk drive: no less than 10 MB of the free space on a disk.
- Enough space on disk with result folder to store recovered data.
- RAM: no less than 1 GB

3. Complete and Demo versions, restrictions.

Complete version of Canon Video Recovery (file Canon Video Recovery.exe)– operates and provides full functionality only if file regkey.dat is available with the conditions corresponding to the bought license.

DEMO version of Canon Video Recovery (file Canon Video Recovery Demo.exe).

Operates and provides all functionality of the program with this restriction: Only a small part of all recovered files will be saved, but you can still see a list of all recovered files in the log.

Demo version is standalone executable file that does not need any license file.

4. Purchase and software installation.

Demo version requires to download the latest version of **Canon Video Recovery** from the website <http://soft.512byte.ua> and to run *Canon Video RecoveryDemo.exe*.

The complete version requires the next steps:

1. Pay the license on the website <http://soft.512byte.ua>.
2. Wait for receiving files *GetHardwareIDwl.exe* and *Canon Video Recovery.exe* by E-mail mentioned in the previous point.
3. Run the program *GetHardwareIDwl.exe* on the PC where *Canon Video Recovery.exe* is planned to be used.
 - 3.1. Send to E-mail:soft@512byte.ua the text file *HardwareID.txt* with information about the equipment. Example of the *HardwareID.txt* file content: "Your Hardware ID: 1055-4E4B-5E3C-9DA0-6F37-EBCA-281B-3CF8".
4. Wait till the file with the license *regkey.dat* will be received by the mentioned E-mail.
5. Place the received *regkey.dat* file in the folder with *Canon Video Recovery.exe*.
6. Run *Canon Video Recovery.exe*.

5. Order of the software use. Interface.

To run Canon Video Recovery, you must provide administrator rights.

The main program's window is used for setting of input data and basic parameters.

1. Source:

Here you can choose data source (**Drive** or **Image**).

Start LBA, Finish LBA – allow you to set boundaries for a disk or image to read.

2. Additional options:

Data carving – here you can choose data carving algorithm.

Version 1 (by example) – recovers files according to the example of a video file

that was taken on the selected camera.

Version 2 – is used when you do not have an example of video file.

Date interval – only those files that are in this interval will be saved.

3. Result:

Here you can choose **result folder**, open it and **start** recovering.

6. **Software messages description.**

In case of unhandled exceptions, the program will show a message window with an error.

If you see this message, please contact us by e-mail soft@512byte.ua.
